

New Beast From The East 2.0

Using Satellite technology, we are able to see that a new 'Beast From The East' will hit in the following weekend. The following conversation took place with Miss Hilton, teacher of Geography at the Ramsey Academy, about this subject:

'Good Morning Miss Hilton we would like to ask you some questions about the new Beast from the East and what you think about it.'

'Personally I enjoyed it because it meant I got a couple of days off work, and I know that for a lot of people that it was the first snowfall they'd experienced in 4 or 5 years, however it was incredibly disruptive for some people.'

'So, what do you think of the oncoming storm?'

'It came as a shock to me when I heard that we were going to get a Beast from the East part 2 or as I heard someone on the radio call it son of the beast because it was a bit smaller, as far as I'm aware we are going to get very little amount of snow, hopefully school won't be closed.'

'Do you think the storm will come or are people over reacting?'

'I think it will come I think the bbc weather and the MET office and other meteorological services they have said that there will or there probably is, but I think people are putting it up to the same level we previously had 2 weeks ago.'
